...To anywhere else your
imagination can go, we have one of
the largest selections of log furniture
and accessories to help you make your
cabin and rustic dreams become a reality.

About Us

In the summer of 1997, young entrepreneur, Randy Jackson, began producing log porch swings. The plan was to master the production of these swings and ship them throughout the United States. In the early spring of 1998, I joined my brother in his venture. The plan to mass produce porch swings soon changed as we received requests for beds, dressers, dining tables, chairs and many other furniture products. Since that time, we have gone from one key product to over two hundred.

Our unique designs, large selection, continuous product improvement and highly competitive prices have generated demand throughout the country. Our furniture can be found in homes, cabins, restaurants and lodges throughout the United States, Canada and even Europe.

Along with log furniture, we have added items to our selection from other manufacturers throughout the country in order to offer numerous lines of accessories such as a wide variety of curios, metal works, signs, bedding, wood carvings and burnings, photography, metal and antler chandeliers and many others.

We are confident that you will fall in love with our personal and friendly customer service as well as our selection and prices.

Sincerely,
Rodney and Kim Jackson
